Example: A diet high in saturated fat can lead to the clogging of arteries.

(Danh từ chỉ động mạch.)

Asthma /'æzmə/ (n) — A respiratory condition marked by attacks of spasm in the bronchi of the lungs.

Example: Air pollution can trigger severe asthma attacks in vulnerable children.

(Danh từ chỉ bệnh hen suyễn.)

Bacteria /bæk'tɪrɪə/ (n) — Unicellular microorganisms which have cell walls but lack organelles.

Example: Not all bacteria are harmful; some are essential for our digestion.

(Danh từ chỉ vi khuẩn.)

Bandage /'bændɪdʒ/ (n) — A strip of material used to bind a wound or a protected injured part of the body.

Example: He wrapped a clean bandage around his sprained ankle.

(Danh từ chỉ băng gạc.)

Benign /br'nəm/ (adj) — (Of a disease) not harmful in effect; in particular, not malignant.

Example: The biopsy results showed that the tumor was benign, much to our relief.

(Tính từ chỉ khối u lành tính, không gây hại.)

Blood pressure /'bləd ,prefə/ (n) — The pressure of the blood in the circulatory system.

Example: High blood pressure can increase the risk of having a stroke or heart attack.

(Cụm danh từ chỉ huyết áp.)

Blood vessel /'bləd ,vesl/ (n) — A tubular structure carrying blood through the tissues and organs.

Example: Small blood vessels are responsible for delivering oxygen to every cell.

(Cụm danh từ chỉ mạch máu.)

Body mass index /,bɑ:di 'mæs ,indeks/ (n) — A weight-to-height ratio used as an indicator of obesity.

Example: Your body mass index can help you determine if you are at a healthy weight.

(Cụm danh từ chỉ chỉ số khối cơ thể - BMI.)

Boost /bu:st/ (v) — Help or encourage (something) to increase or improve.

Example: Vitamin C is known to help boost the body's natural defenses.

(Động từ chỉ sự thúc đẩy, làm tăng cường sức khỏe.)

Brainstorm /'breɪnstɔ:rm/ (n) — A sudden clever idea; also a period of mental confusion.

Example: Extreme fatigue can sometimes lead to a temporary brainstorm or confusion.

(Trong y tế có thể chỉ cơn rối loạn tâm trí đột ngột.)

Bronchitis /bra:ŋ'kaɪtɪs/ (n) — Inflammation of the mucous membrane in the bronchial tubes.

Example: Smoking is the leading cause of chronic bronchitis in adults.

(Danh từ chỉ bệnh viêm phế quản.)

Bruise /bru:z/ (n) — An injury appearing as an area of discolored skin on the body.

Example: She had a large bruise on her arm after falling off her bicycle.

(Danh từ chỉ vết bầm tím.)

Calorie /'kæləri/ (n) — A unit of energy often used to measure the energy value of foods.

Example: To lose weight, you need to consume fewer calories than you burn each day.

(Danh từ chỉ đơn vị năng lượng calo.)

Cancer /'kænsər/ (n) — A disease caused by an uncontrolled division of abnormal cells.

Example: Early screening is vital for the successful treatment of many types of cancer.

(Danh từ chỉ bệnh ung thư.)

Capsule /'kæpsu:l/ (n) — A small case

or container, especially a soluble one enclosing a dose of medicine.

Example: Please take one capsule of this medicine twice a day with water.

(Danh từ chỉ thuốc viên nang.)

Carbohydrate /,ka:rboʊ'haidreit/ (n) — Large group of organic compounds occurring in foods and living tissues.

Example: Athletes often eat high-carbohydrate meals before a big race for energy.

(Danh từ chỉ chất bột đường/tinh bột.)

Cardiac /'ka:rdɪæk/ (adj) — Relating to the heart.

Example: Regular cardio exercises are beneficial for maintaining cardiac health.

(Tính từ chỉ những gì liên quan đến tim mạch.)

Cardiovascular /,ka:rdioʊ'væskjələr/ (adj) — Relating to the heart and blood vessels.

Example: Cardiovascular disease remains one of the leading causes of death globally.

(Tính từ chỉ hệ tim mạch.)

Casualty /'kæʒuəlti/ (n) — A person killed or injured in a war or accident.

Example: The casualties were immediately taken to the nearest hospital for treatment.

(Danh từ chỉ thương vong hoặc phòng cấp cứu.)

Checkup /'tʃekʌp/ (n) — A thorough medical examination.

Example: Routine checkups help in the early detection of potential health issues.

(Lặp lại để nhấn mạnh nghĩa danh từ viết liền.)

Chemotherapy /,ki:məʊ'therəpi/ (n) — The treatment of disease by the use of chemical substances.

Example: Chemotherapy is often used in combination with surgery to treat cancer.

(Danh từ chỉ hóa trị.)

Cholesterol /kə'lestərɔ:l/ (n) — A compound found in most body tissues.

Example: High levels of LDL cholesterol can lead to heart disease.

(Danh từ chỉ cholesterol trong máu.)

Clinic /'klnɪk/ (n) — An establishment or hospital department where outpatients are given medical treatment.

Example: She works as a pediatrician at a local health clinic.

(Danh từ chỉ phòng khám.)

Cognitive /'kɑ:gnətɪv/ (adj) — Relating to cognition; mental action or process of acquiring knowledge.

Example: Cognitive decline can be a natural part of aging for some individuals.

(Tính từ chỉ nhận thức.)

Condition /kən'dɪʃn/ (n) — A state of physical or mental fitness or a specific illness.

Example: The patient is in a stable condition after the successful surgery.

(Danh từ chỉ tình trạng sức khỏe hoặc bệnh lý.)

Contagious /kən'teɪdʒəs/ (adj) — (Of a disease) spread from one person or organism to another by direct or indirect contact.

Example: Chickenpox is extremely contagious among children who haven't been vaccinated.

(Tính từ chỉ bệnh truyền nhiễm/lây lan nhanh.)

Convalescence /ˌkɑ:nvə'lesns/ (n) — Time spent recovering from an illness or medical treatment.

Example: After the operation, he needed a long period of convalescence at home.

(Danh từ chỉ thời kỳ dưỡng bệnh/hồi phục.)

Cough /kɔ:f/ (n/v) — Expel air from the lungs with a sudden sharp sound.

Example: She has a persistent cough that hasn't gone away for two weeks.

(Danh từ/Động từ chỉ triệu chứng ho.)

Cure /kjʊr/ (n/v) — Relieve (a person or animal) of the symptoms of a disease or condition.

Example: Scientists are still searching for a definitive cure for the common cold.

(Danh từ/Động từ chỉ sự chữa khỏi/liều thuốc.)

Dehydration /ˌdi:hai'dreɪʃn/ (n) — A harmful reduction in the amount of water in the body.

Example: Drinking plenty of water during exercise prevents dehydration.

(Danh từ chỉ sự mất nước.)

Dementia /dɪ'menʃə/ (n) — A chronic or persistent disorder of the mental processes caused by brain disease.

Example: Alzheimer's is the most common form of dementia in elderly people.

(Danh từ chỉ chứng sa sút trí tuệ.)

Dentistry /'dentɪstri/ (n) — The profession or practice of a dentist.

Example: Advances in dentistry have made dental procedures much less painful.

(Danh từ chỉ nha khoa.)

Depression /dɪ'preʃn/ (n) — A mental health disorder characterized by persistently depressed mood.

Example: Depression is a serious medical illness that requires professional help.

(Danh từ chỉ bệnh trầm cảm.)

Dermatologist /ˌdɜ:rmə'ta:lədʒɪst/ (n) — A medical practitioner qualified to diagnose and treat skin disorders.

Example: You should see a dermatologist if you notice any unusual moles on your skin.

(Danh từ chỉ bác sĩ da liễu.)

Diabetes /ˌdaɪə'bi:tɪz/ (n) — A disease in which the body's ability to produce or respond to the hormone insulin is impaired.

Example: People with diabetes need to monitor their blood sugar levels carefully.

(Danh từ chỉ bệnh tiểu đường.)

Diet /'daɪət/ (n) — The kinds of food that a person, animal, or community habitually eats.

Example: A balanced diet includes a variety of fruits, vegetables, and proteins.
(Danh từ chỉ chế độ ăn uống.)

Dietitian /ˈdaɪəˈtɪʃn/ (n) — An expert on diet and nutrition.

Example: The dietitian helped him create a meal plan to manage his weight.
(Danh từ chỉ chuyên gia dinh dưỡng.)

Digest /daɪˈdʒest/ (v) — Break down food in the alimentary canal into substances that can be absorbed by the body.

Example: It takes several hours for the body to fully digest a heavy meal.
(Động từ chỉ sự tiêu hóa.)

Disorder /dɪsˈɔːrdər/ (n) — A state of confusion; also a physical or mental condition that is not normal.

Example: Eating disorders can have severe consequences for a person's physical health.
(Danh từ chỉ sự rối loạn chức năng hoặc bệnh tật.)

Dizziness /ˈdɪzɪnəs/ (n) — A sensation of spinning and losing one's balance.

Example: Low blood sugar can often cause sudden bouts of dizziness.
(Danh từ chỉ sự chóng mặt.)

Dose /doʊs/ (n) — A quantity of a medicine or drug taken or recommended to be taken at a particular time.

Example: Do not exceed the recommended dose of this painkiller.
(Danh từ chỉ liều lượng thuốc.)

Drugstore /ˈdrʌɡstɔːr/ (n) — A shop where medicinal drugs are dispensed and sold.

Example: I need to stop by the drugstore to pick up some cough syrup.
(Danh từ chỉ hiệu thuốc.)

Dyslexia /dɪsˈleksiə/ (n) — A general term for disorders that involve difficulty in learning to read or interpret words.

Example: Many famous and successful people have struggled with dyslexia.
(Danh từ chỉ chứng khó đọc.)

Earache /ˈɪreɪk/ (n) — Pain in the inside of the ear.

Example: Children often get an earache after suffering from a cold.
(Danh từ chỉ sự đau tai.)

Eating disorder /ˈiːtɪŋ dɪsˈɔːrdər/ (n) — Any of a range of psychological disorders characterized by abnormal or disturbed eating habits.

Example: Anorexia and bulimia are two common types of eating disorders.
(Cụm danh từ chỉ rối loạn ăn uống.)

Elderly /ˈeldərli/ (adj) — (Of a person) old or aging.

Example: Special health care services are provided for the elderly in our community.
(Tính từ chỉ người cao tuổi.)

Emergency /ɪˈmɜːrdʒənsi/ (n) — A serious, unexpected, and often dangerous situation requiring immediate action.

Example: In case of an emergency, please dial 911 immediately.
(Danh từ chỉ trường hợp khẩn cấp.)

Emotional /ɪˈmoʊʃənl/ (adj) — Relating to a person's emotions.

Example: Support from friends is crucial for maintaining emotional well-being.
(Tính từ chỉ cảm xúc.)

Endurance /mˈdʊərəns/ (n) — The fact or power of enduring an unpleasant or difficult process or situation without giving way.

Example: Running marathons requires a high level of physical endurance.
(Danh từ chỉ sức chịu đựng/sức bền.)

Energy /ˈenərʒi/ (n) — The strength and vitality required for sustained physical or mental activity.

Example: Eating a healthy breakfast gives you the energy you need for the day.
(Danh từ chỉ năng lượng.)

Enzyme /ˈenzaim/ (n) — A substance produced by a living organism which acts as a catalyst to bring about a specific biochemical reaction.

Example: *Enzymes play a vital role in breaking down food during digestion.*
(Danh từ chỉ men tiêu hóa/enzym.)

Examination /ɪɡˌzæmɪˈneɪʃn/ (n) — A detailed inspection or investigation.

Example: *The doctor conducted a physical examination to find the cause of the pain.*
(Trong y tế là sự thăm khám bệnh.)

Exercise /ˈeksəsaɪz/ (n/v) — Activity requiring physical effort, carried out to sustain or improve health and fitness.

Example: *Regular exercise can help reduce the risk of many chronic diseases.*
(Danh từ/Động từ chỉ sự tập thể dục.)

Exhale /eksˈheɪl/ (v) — Breathe out.

Example: *Inhale deeply through your nose and exhale slowly through your mouth.*
(Động từ chỉ sự thở ra.)

Expire /ɪkˈspaɪər/ (v) — (Of a period of time) come to an end; (of a medicine) reach its used-by date.

Example: *Check the label to make sure the medicine hasn't expired.*
(Động từ chỉ sự hết hạn dùng thuốc.)

Eye-strain /ˈaɪ streɪn/ (n) — Fatigue of the eyes caused by excessive use or uncorrected defects of vision.

Example: *Working at a computer for long hours can cause severe eye-strain.*
(Danh từ chỉ sự mỏi mắt.)

Fever /ˈfiːvər/ (n) — An abnormally high body temperature.

Example: *A high fever is often a sign that your body is fighting an infection.*
(Danh từ chỉ cơn sốt.)

First aid /fɜːrst ˈeɪd/ (n) — Help given to a sick or injured person until full medical treatment is available.

Example: *Everyone should learn basic first aid to help in case of an accident.*
(Cụm danh từ chỉ sơ cứu.)

Fitness /ˈfɪtnəs/ (n) — The condition of being physically fit and healthy.

Example: *She goes to the gym every morning to maintain her level of fitness.*

(Danh từ chỉ sự sung sức, thể trạng khỏe mạnh.)

Flu /fluː/ (n) — Influenza; a highly contagious viral infection of the respiratory passages.

Example: *Getting a flu shot every year is a good way to stay healthy.*
(Danh từ chỉ bệnh cúm.)

Fracture /ˈfræktʃər/ (n/v) — The cracking or breaking of a hard object or material, typically a bone.

Example: *The X-ray confirmed that he had a small fracture in his wrist.*
(Danh từ/Động từ chỉ sự gãy xương.)

Fungus /ˈfʌŋɡəs/ (n) — Any of a group of spore-producing organisms feeding on organic matter.

Example: *Athlete's foot is a common skin infection caused by a fungus.*
(Danh từ chỉ nấm/bệnh nấm.)

General practitioner /ˌdʒenrəl prækˈtɪʃənər/ (n) — A doctor who does not specialize in a particular area of medicine.

Example: *If you have a health problem, you should see your general practitioner first.*
(Cụm danh từ chỉ bác sĩ đa khoa - GP.)

Genetic /dʒəˈnetɪk/ (adj) — Relating to genes or heredity.

Example: *Some diseases are genetic and can be passed from parents to children.*
(Tính từ chỉ di truyền.)

Germ /dʒɜːrm/ (n) — A microorganism, especially one which causes disease.

Example: *Washing your hands frequently helps to kill germs and prevent illness.*
(Danh từ chỉ vi trùng, mầm bệnh.)

Gland /glænd/ (n) — An organ which secretes particular chemical substances for use in the body. (Danh từ chỉ tuyến (tuyến giáp, tuyến mồ hôi...)).

Example: *The thyroid gland plays a crucial role in regulating metabolism.*
()

Glucose /ˈgluːkoʊs/ (n) — A simple

sugar which is an important energy source in living organisms.

Example: *The body converts carbohydrates into glucose to provide energy for cells.*
(Danh từ chỉ đường glucose.)

Handicap /'hændikæp/ (n) — A condition that markedly restricts a person's ability to function physically, mentally, or socially.

Example: *Technology has provided many new ways for people with a handicap to lead independent lives.*
(Danh từ chỉ sự khuyết tật.)

Health /helθ/ (n) — The state of being free from illness or injury.

Example: *Wealth is useless if you don't have your health.*
(Danh từ gốc chỉ sức khỏe.)

Healthcare /'helθkə/ (n) — The organized provision of medical care to individuals or a community.

Example: *Access to affordable healthcare is a major issue in many countries.*
(Danh từ chỉ dịch vụ y tế/chăm sóc sức khỏe.)

Healthy /'helθi/ (adj) — In good health.

Example: *Eating a healthy diet is essential for maintaining a long life.*
(Tính từ chỉ sự khỏe mạnh.)

Heart attack /'hɑ:rt ə,tæk/ (n) — A sudden and sometimes fatal occurrence of coronary thrombosis, typically resulting in the death of part of a heart muscle.

Example: *He was hospitalized after suffering a minor heart attack.*
(Cụm danh từ chỉ cơn đau tim.)

Heartbeat /'hɑ:rtbi:t/ (n) — The pulsation of the heart.

Example: *Your heartbeat increases when you are exercising or stressed.*
(Danh từ chỉ nhịp tim.)

Hereditary /hə'rediteri/ (adj) — (Of a characteristic or disease) determined by genetic factors and therefore able to be passed on from parents to offspring.

Example: *Some forms of high blood pressure are hereditary.*
(Tính từ chỉ tính di truyền.)

Homeopathy /,həʊmi'a:pəθi/ (n) — The treatment of disease by minute doses of natural substances.

Example: *Many people use homeopathy as a complementary therapy alongside conventional medicine.*
(Danh từ chỉ phép chữa bệnh bằng phương pháp vi lượng đồng căn.)

Hormone /'hɔ:rmɒn/ (n) — A regulatory substance produced in an organism and transported in tissue fluids.

Example: *Hormones control many important functions in the body, including growth and reproduction.*
(Danh từ chỉ hoóc-môn/nội tiết tố.)

Hospice /'hɑ:spis/ (n) — A home providing care for the sick, especially the terminally ill.

Example: *The hospice provides a peaceful and caring environment for patients in their final days.*
(Danh từ chỉ nhà tế bần/nơi chăm sóc bệnh nhân giai đoạn cuối.)

Hospital /'hɑ:spɪtl/ (n) — An institution providing medical and surgical treatment and nursing care for sick or injured people.

Example: *She was taken to the hospital for further tests and observation.*
(Danh từ chỉ bệnh viện.)

Hydrotherapy /,haɪdrəʊ'therəpi/ (n) — The use of exercises in a pool as part of treatment for conditions such as arthritis or partial paralysis.

Example: *Hydrotherapy can be very effective for relieving joint pain and stiffness.*
(Danh từ chỉ thủy liệu pháp.)

Hypothermia /,haɪpəʊ'θɜ:rmɪə/ (n) — The condition of having an abnormally low body temperature.

Example: *Hikers need to be careful of hypothermia when traveling in cold and wet conditions.*
(Danh từ chỉ chứng hạ thân nhiệt.)

Immune /ɪ'mju:n/ (adj) — Resistant to a particular infection or toxin owing to the presence of specific antibodies.

Example: Vaccination makes you immune to certain infectious diseases.
(Tính từ chỉ sự miễn dịch.)

Immunity /ɪ'mju:nəti/ (n) — The ability of an organism to resist a particular infection.

Example: Babies get some natural immunity from their mother's milk.
(Danh từ chỉ sự miễn dịch.)

Immunize /'ɪmjunaɪz/ (v) — Make (a person or animal) immune to infection, typically by inoculation.

Example: It is important to immunize children against common childhood diseases.
(Động từ chỉ việc gây miễn dịch.)

Incurable /ɪn'kjʊərəbl/ (adj) — (Of a sick person or a disease) not able to be cured.

Example: Some forms of cancer are still incurable despite advances in medical science.
(Tính từ chỉ bệnh nan y, không thể chữa khỏi.)

Indigestion /,ɪndɪ'dʒestʃən/ (n) — Pain or discomfort in the stomach associated with difficulty in digesting food.

Example: Eating too quickly can often cause a painful bout of indigestion.
(Danh từ chỉ chứng khó tiêu.)

Infection /ɪn'fekʃn/ (n) — The process of infecting or the state of being infected.

Example: Use an antiseptic to clean the cut and prevent an infection.
(Danh từ chỉ sự nhiễm trùng.)

Inflammation /,ɪnflə'meɪʃn/ (n) — A physical condition in which part of the body becomes reddened, swollen, hot, and often painful.

Example: Arthritis causes painful inflammation of the joints.
(Danh từ chỉ sự viêm nhiễm.)

Influenza /,ɪnflu'enza/ (n) — Flu; a highly contagious viral infection of the

respiratory passages.

Example: The influenza virus can mutate rapidly, making it difficult to control.
(Danh từ đầy đủ của bệnh cúm.)

Inhale /ɪn'heɪl/ (v) — Breathe in.

Example: Deep breathing exercises help you inhale more oxygen and relax.
(Động từ chỉ sự hít vào.)

Injection /ɪn'dʒekʃn/ (n) — An instance of injecting or being injected.

Example: The nurse gave him a quick injection to relieve the pain.
(Danh từ chỉ sự tiêm thuốc.)

Injure /'ɪndʒər/ (v) — Do physical harm or damage to (someone).

Example: Be careful not to injure your back when lifting heavy objects.
(Động từ chỉ việc làm bị thương.)

Injury /'ɪndʒəri/ (n) — An instance of being injured.

Example: He suffered a serious head injury in the car accident.
(Danh từ chỉ vết thương.)

Inpatient /'ɪnpeɪfnt/ (n) — A patient who stays in a hospital while receiving treatment.

Example: The hospital has over five hundred beds for inpatients.
(Danh từ chỉ bệnh nhân nội trú.)

Insomnia /ɪn'sa:mniə/ (n) — Habitual sleeplessness; inability to sleep.

Example: Stress and anxiety are common causes of chronic insomnia.
(Danh từ chỉ chứng mất ngủ.)

Insulin /'ɪnsəlɪn/ (n) — A hormone produced in the pancreas by the islets of Langerhans.

Example: People with Type 1 diabetes need daily injections of insulin.
(Danh từ chỉ hoóc-môn insulin.)

Intensive care /ɪn'tensɪv 'keɪ/ (n) — Specialized medical facilities and services for patients who are seriously ill.

Example: After the surgery, the patient was moved to the intensive care unit.

(Danh từ chỉ sự chăm sóc đặc biệt/hồi sức cấp cứu.)

Internal /ɪn'tɜːnl/ (adj) — Of or situated on the inside.

Example: Internal bleeding can be a life-threatening emergency.

(Tính từ chỉ nội tạng/bên trong cơ thể.)

Invalid /ɪn'vəlɪd/ (n) — A person made weak or disabled by illness or injury.

Example: He spent his final years as an invalid, cared for by his family.

(Danh từ chỉ người tàn tật hoặc đau yếu lâu ngày.)

Itch /ɪtʃ/ (n/v) — An uncomfortable sensation on the skin that causes a desire to scratch.

Example: Mosquito bites often cause an annoying itch that lasts for several days.

(Danh từ/Động từ chỉ sự ngứa ngáy.)

Jaundice /'dʒɔːndɪs/ (n) — A medical condition with yellowing of the skin or whites of the eyes.

Example: Jaundice can be a sign of a liver or gallbladder problem.

(Danh từ chỉ bệnh vàng da.)

Joint /dʒɔɪnt/ (n) — A structure in the human or animal body at which two parts of the skeleton are fitted together.

Example: Regular stretching can help keep your joints flexible and healthy.

(Danh từ chỉ khớp xương.)

Kidney /'kɪdni/ (n) — Each of a pair of organs in the abdominal cavity that excrete urine.

Example: Drinking plenty of water is essential for maintaining kidney health.

(Danh từ chỉ quả thận.)

Laceration /,læsə'reɪʃn/ (n) — A deep cut or tear in skin or flesh.

Example: The doctor needed to put several stitches in the laceration on his arm.

(Danh từ chỉ vết rách da sâu.)

Latent /'leɪnt/ (adj) — (Of a quality or state) existing but not yet developed or

manifest; hidden or concealed.

Example: The virus can remain latent in the body for many years before symptoms appear.

(Trong y tế chỉ mầm bệnh đang ủ bệnh.)

Laxative /'læksətɪv/ (n) — A medicine which has a laxative effect.

Example: Natural laxatives like fiber and water are usually better than chemical ones.

(Danh từ chỉ thuốc nhuận tràng.)

Lethargic /lə'thɑːrdʒɪk/ (adj) — Affected by lethargy; sluggish and apathetic.

Example: Iron deficiency can make you feel very tired and lethargic.

(Tính từ chỉ sự lơ đãng, uể oải.)

Leukemia /luː'kiːmiə/ (n) — A malignant progressive disease in which the bone marrow and other blood-forming organs produce increased numbers of immature or abnormal leukocytes.
