

IELTS VOCABULARY

THE FORUM CENTER - NGUYỄN HOÀNG HUY

VOCABULARY ĐỘC QUYỀN

TỪ VỰNG CHỦ ĐỀ: PSYCHOLOGY & PERSONALITY (TÂM LÝ HỌC VÀ TÍNH CÁCH)

Cognitive /'ka:gnətrv/ (adj) — Relating to the mental action or process of acquiring knowledge and understanding.

Example: Cognitive development in children is influenced by both genetics and environment.

(Đây là một tính từ dùng để chỉ các quá trình thuộc về nhận thức như tư duy, trí nhớ và lý luận.)

Ambivert /'æmbivɜ:rt/ (n) — A person whose personality has a balance of extrovert and introvert features.

Example: As an ambivert, she enjoys social gatherings but also values her alone time to recharge.

(Đây là một danh từ dùng để chỉ người có tính cách hướng trung, pha trộn giữa hướng nội và hướng ngoại.)

Conscientious /kənʃi'entʃəs/ (adj) — Wishing to do one's work or duty well and thoroughly.

Example: A conscientious student always meets deadlines and pays attention to the smallest details.

(Đây là một tính từ dùng để chỉ người tận tâm, chu đáo và luôn làm việc có trách nhiệm.)

Resilience /rɪ'zɪliəns/ (n) — The capacity to recover quickly from difficulties; toughness.

Example: Psychological resilience helps individuals cope with stress and trauma effectively.

(Đây là một danh từ dùng để chỉ khả năng phục hồi, sự kiên cường trước nghịch cảnh.)

Altruism /'æltruizəm/ (n) — The belief in or practice of disinterested and selfless concern for the well-being of others.

Example: Many charities rely on the altruism of donors to fund their community projects.

(Đây là một danh từ dùng để chỉ lòng vị tha, sự quan tâm không vụ lợi đến người khác.)

Neuroticism /njʊ'rɒtɪsɪzəm/ (n) — A personality trait characterized by anxiety, fear, moodiness, and physical complaints.

Example: High levels of neuroticism can lead to frequent feelings of worry and emotional instability.

(Đây là một danh từ dùng để chỉ tâm lý bất ổn, dễ bị lo âu hoặc căng thẳng.)

Empathy /'empəθi/ (n) — The ability to understand and share the feelings of another.

Example: Doctors need a high degree of empathy to provide better care for their patients.

(Đây là một danh từ dùng để chỉ sự đồng cảm, khả năng thấu hiểu cảm xúc của người khác.)

Narcissism /'na:rsɪsɪzəm/ (n) — Excessive interest in or admiration of oneself and one's physical appearance.

Example: Social media is often criticized for fueling narcissism among young adults.

(Đây là một danh từ dùng để chỉ ái kỷ, sự tự phụ hoặc quá yêu bản thân.)

Extroversion /'ekstrə'vɜ:rʒn/ (n) — The quality of being outgoing and directing attention to things other than oneself.

Example: His extroversion makes him an excellent candidate for sales and public relations roles.

(Đây là một danh từ dùng để chỉ tính hướng ngoại.)

Introversion /'ɪntrə'vɜ:rʒn/ (n) — The state of or tendency toward being wholly or predominantly concerned with and interested in one's own mental life.

Example: *Introversion should not be confused with shyness, as it is simply a preference for quiet environments.*
(Đây là một danh từ dùng để chỉ tính hướng nội.)

Subconscious /ˌsʌbˈkɑːnfəs/ (adj/n) — Concerning the part of the mind of which one is not fully aware but which influences one's actions.

Example: *Many of our fears are rooted in our subconscious mind and childhood experiences.*
(Đây là một tính từ/danh từ dùng để chỉ tiềm thức.)

Behaviorism /bɪˈhɛvjərɪzəm/ (n) — The theory that human behavior can be explained in terms of conditioning.

Example: *Behaviorism focuses on observable actions rather than internal mental states.*
(Đây là một danh từ dùng để chỉ thuyết hành vi trong tâm lý học.)

Temperament /ˈtɛmprəmənt/ (n) — A person's or animal's nature, especially as it permanently affects their behavior.

Example: *My sister has a very calm temperament, even when dealing with stressful situations.*
(Đây là một danh từ dùng để chỉ khí chất hoặc tính khí tự nhiên của một người.)

Phobia /ˈfəʊbiə/ (n) — An extreme or irrational fear of or aversion to something.

Example: *Claustrophobia is a common phobia involving the fear of being in enclosed spaces.*
(Đây là một danh từ dùng để chỉ nỗi ám ảnh cưỡng chế hoặc nỗi sợ vô lý.)

Perception /pəˈsɛpʃn/ (n) — The ability to see, hear, or become aware of something through the senses.

Example: *Public perception of mental health issues has changed significantly over the last decade.*
(Đây là một danh từ dùng để chỉ sự nhận thức hoặc cách nhìn nhận sự việc.)

Self-esteem /ˌsɛlf ɪˈstiːm/ (n) — Confidence in one's own worth or abilities;

self-respect.

Example: *Low self-esteem can prevent people from pursuing their goals and dreams.*

(Đây là một danh từ dùng để chỉ lòng tự trọng hoặc sự tự tin vào giá trị bản thân.)

Motivation /ˌmoʊtɪˈveɪʃn/ (n) — The reason or reasons one has for acting or behaving in a particular way.

Example: *Intrinsic motivation is often more powerful than external rewards for long-term success.*
(Đây là một danh từ dùng để chỉ động lực.)

Trauma /ˈtraʊmə/ (n) — A deeply distressing or disturbing experience.

Example: *It takes time and professional support to recover from childhood trauma.*
(Đây là một danh từ dùng để chỉ chấn thương tâm lý hoặc cú sốc tinh thần.)

Anxiety /æŋˈzaɪəti/ (n) — A feeling of worry, nervousness, or unease, typically about an imminent event.

Example: *Test anxiety can prevent students from performing to the best of their abilities.*
(Đây là một danh từ dùng để chỉ sự lo âu hoặc trạng thái bồn chồn.)

Cognitive dissonance /ˌkɑːɡnətrɪv ˈdɪsənəns/ (n) — The state of having inconsistent thoughts, beliefs, or attitudes.

Example: *People often experience cognitive dissonance when their actions do not align with their values.*
(Đây là một cụm danh từ dùng để chỉ sự mâu thuẫn nhận thức.)

Archetype /ˈɑːrkitaɪp/ (n) — A very typical example of a certain person or thing.

Example: *The "Hero" is a common archetype found in the myths and legends of almost every culture.*
(Trong tâm lý học, đây là danh từ chỉ các hình mẫu nguyên mẫu trong tâm trí con người.)

Conditioning /kənˈdɪʃənɪŋ/ (n) — The process of training or accustoming a

person or animal to behave in a certain way.

Example: *Pavlov's experiments are the most famous examples of classical conditioning.*

(Đây là một danh từ dùng để chỉ sự điều kiện hóa/phản xạ có điều kiện.)

Defense mechanism /di'fens 'mekənɪzəm/ (n) — An automatic mental process used to avoid conscious conflict or anxiety.

Example: *Denial is a common defense mechanism used to protect oneself from painful truths.*

(Đây là một cụm danh từ dùng để chỉ cơ chế phòng vệ tâm lý.)

Ego /'i:ɡoʊ/ (n) — A person's sense of self-esteem or self-importance.

Example: *He has a massive ego and finds it very difficult to accept any kind of criticism.*

(Đây là một danh từ dùng để chỉ cái tôi.)

Empathize /'empəθaɪz/ (v) — Understand and share the feelings of another.

Example: *It is easier to empathize with someone if you have experienced a similar situation.*

(Đây là một động từ dùng để chỉ việc đồng cảm với ai đó.)

Gratification /,grætɪfɪ 'keɪfɪn/ (n) — Pleasure, especially when gained from the satisfaction of a desire.

Example: *The ability to delay gratification is often a predictor of future success.*

(Đây là một danh từ dùng để chỉ sự hài lòng hoặc thỏa mãn.)

Hallucination /həˌluːsɪ'neɪʃn/ (n) — An experience involving the apparent perception of something not present.

Example: *Certain mental illnesses can cause patients to suffer from vivid visual hallucinations.*

(Đây là một danh từ dùng để chỉ ảo giác.)

Inhibition /ˌɪnhɪ'bɪʃn/ (n) — A feeling that makes one self-conscious and unable to act in a relaxed and natural way.

Example: *Alcohol often lowers people's inhibitions, making them more talkative and outgoing.*

(Đây là một danh từ dùng để chỉ sự ức chế hoặc sự e dè, thiếu tự nhiên.)

Introvert /'ɪntrəvɜːrt/ (n) — A shy, reticent person.

Example: *As an introvert, he prefers small gatherings of close friends over large parties.*

(Đây là một danh từ dùng để chỉ người hướng nội.)

Libido /lɪ'biːdoʊ/ (n) — Sexual desire.

Example: *Freud believed that the libido was a primary driving force behind human behavior.*

(Trong tâm lý học, đây là danh từ chỉ năng lượng tình dục hoặc bản năng sống.)

Masochism /'mæsəkɪzəm/ (n) — The tendency to derive pleasure from one's own pain or humiliation.

Example: *His constant pursuit of difficult and painful tasks seemed almost like a form of masochism.*

(Đây là một danh từ dùng để chỉ chứng bạo dâm hoặc xu hướng tự ngược đãi.)

Melancholy /'meləŋkəːli/ (n/adj) — A feeling of pensive sadness, typically with no obvious cause.

Example: *The rainy weather always puts me in a state of deep melancholy.*

(Đây là một danh từ/tính từ dùng để chỉ sự u sầu hoặc trầm mặc.)

Obsession /əb'sesʃn/ (n) — A persistent, often uncontrollable, preoccupation with an idea, feeling, or person.

Example: *His obsession with detail made him a very effective, but often stressed, accountant.*

(Đây là một danh từ dùng để chỉ sự ám ảnh/nỗi ám ảnh.)

Paranoia /ˌpærə'noɪə/ (n) — A mental condition characterized by delusions of persecution.

Example: *Suffering from severe paranoia, he was convinced that his neighbors were spying on him.*

(Đây là một danh từ dùng để chỉ chứng hoang tưởng bộ phát.)

Projection /prəˈdʒekʃn/ (n) — The mental process by which people attribute to others what is in their own minds.

Example: Her anger towards her boss was actually a projection of her own feelings of inadequacy.

(Trong tâm lý học, đây là sự phóng chiếu cảm xúc cá nhân lên người khác.)

Psychosis /saɪˈkɒsɪs/ (n) — A severe mental disorder in which thought and emotions are so impaired that contact is lost with external reality.

Example: During a period of psychosis, the patient was unable to distinguish between reality and fantasy.

(Đây là một danh từ dùng để chỉ bệnh tâm thần phân liệt hoặc rối loạn tâm thần nặng.)

Rationalization /ˌræʃnəlaɪˈzeɪʃn/ (n) — The action of attempting to explain or justify behavior or an attitude with logical reasons.

Example: His excuse for failing the test was just a rationalization of his lack of study.

(Đây là một danh từ dùng để chỉ sự hợp lý hóa, tìm cơ bào chữa cho hành vi.)

Regression /rɪˈɡresn/ (n) — A return to a former or less developed state.

Example: The child showed signs of regression, such as thumb-sucking, after the birth of the new baby.

(Trong tâm lý học, đây là sự thoái lui về hành vi của lứa tuổi nhỏ hơn khi gặp căng thẳng.)

Repression /rɪˈpreʃn/ (n) — The action or process of suppressing a thought or desire in oneself so that it remains unconscious.

Example: The repression of painful memories can sometimes lead to psychological problems later in life.

(Đây là một danh từ dùng để chỉ sự dồn nén cảm xúc vào vô thức.)

Sadism /ˈseɪdɪzəm/ (n) — The tendency

to derive pleasure from inflicting pain, suffering, or humiliation on others.

Example: The villain in the movie showed a cruel sense of sadism towards his captives.

(Đây là một danh từ dùng để chỉ chứng ác tâm hoặc thú vui làm khổ người khác.)

Schizophrenia /ˌskɪtsəˈfriːniə/ (n) — A long-term mental disorder involving a breakdown in the relation between thought, emotion, and behavior.

Example: Schizophrenia is a complex condition that often requires long-term medication and support.

(Đây là một danh từ dùng để chỉ bệnh tâm thần phân liệt.)

Self-actualization /ˌselfˌæktʃuəlaɪˈzeɪʃn/ (n) — The realization or fulfillment of one's talents and potentialities.

Example: Maslow believed that self-actualization is the ultimate goal of human psychological development.

(Đây là một danh từ dùng để chỉ sự tự hiện thực hóa, đỉnh cao trong tháp nhu cầu Maslow.)

Socialization /ˌsəʃjəlaɪˈzeɪʃn/ (n) — The process of learning to behave in a way that is acceptable to society.

Example: Schools play a vital role in the socialization of young children.

(Đây là một danh từ dùng để chỉ quá trình xã hội hóa.)

Sublimation /ˌsʌblɪˈmeɪʃn/ (n) — The diversion of the energy of a biological or instinctive impulse into a socially acceptable activity.

Example: He used exercise as a form of sublimation for his aggressive impulses.

(Đây là một danh từ dùng để chỉ sự thăng hoa cảm xúc, chuyển đổi năng lượng tiêu cực thành hành động tích cực.)

Suppression /səˈpreʃn/ (n) — The action of suppressing something such as an activity or publication.

Example: Conscious suppression of anger can sometimes lead to physical health issues like high blood pressure.

(Trong tâm lý, đây là sự kìm nén cảm xúc một cách có ý thức.)

Transference /'trænsfərəns/ (n) — The redirection of feelings and desires, especially of those unconsciously retained from childhood, toward a new object.

Example: The therapist noticed that the patient was exhibiting signs of transference.

(Đây là một danh từ dùng để chỉ sự chuyển di cảm xúc, thường xảy ra giữa bệnh nhân và bác sĩ.)

Unconscious /ʌn'kɔːnʃəs/ (adj/n) — The part of the mind which is inaccessible to the conscious mind but which affects behavior and emotions.

Example: Freud explored the role of the unconscious mind in shaping human personality.

(Đây là một tính từ/danh từ dùng để chỉ vô thức.)

Withdrawal /wɪð'drɔːəl/ (n) — The action of withdrawing something; or social isolation.

Example: Social withdrawal can be an early warning sign of depression.

(Trong tâm lý, đây là sự thu mình hoặc rút lui khỏi các mối quan hệ xã hội.)

Affective /ə'fektɪv/ (adj) — Relating to moods, feelings, and attitudes.

Example: Bipolar disorder is classified as an affective disorder.

(Đây là một tính từ dùng để chỉ các yếu tố thuộc về cảm xúc hoặc tâm trạng.)

Affiliation /ə'fɪli'eɪʃn/ (n) — The state or process of affiliating or being affiliated.

Example: Humans have a strong natural need for social affiliation and belonging.

(Trong tâm lý là nhu cầu liên kết hoặc thuộc về một nhóm nào đó.)

Aggression /ə'ɡresɪn/ (n) — Feelings of anger or antipathy resulting in hostile or violent behavior.

Example: Video games are often debated for their potential role in increasing aggression in children.

(Đây là một danh từ dùng để chỉ sự hung tính hoặc hành vi xâm lược.)

Amnesia /æm'niːzə/ (n) — A partial or total loss of memory.

Example: After the car accident, he suffered from temporary amnesia and couldn't remember his own name.

(Đây là một danh từ dùng để chỉ chứng mất trí nhớ.)

Analysis /ə'næləsɪs/ (n) — Detailed examination of the elements or structure of something.

Example: Psychoanalysis is a method of therapy that involves the deep analysis of dreams and memories.

(Trong tâm lý học là sự phân tâm hoặc phân tích tâm lý.)

Apathy /'æpəθi/ (n) — Lack of interest, enthusiasm, or concern.

Example: Voter apathy is a major problem in many modern democracies.

(Đây là một danh từ dùng để chỉ sự thờ ơ, vô cảm.)

Assertiveness /ə'sɜːrtɪvnəs/ (n) — Confident and forceful behavior.

Example: Training in assertiveness can help people communicate their needs more effectively.

(Đây là một danh từ dùng để chỉ sự quyết đoán hoặc khả năng tự khẳng định mình.)

Attachment /ə'tætʃmənt/ (n) — An extra part or extension that is or can be attached to something.

Example: Early childhood attachment styles can influence future romantic relationships.

(Trong tâm lý học là sự gắn kết tình cảm, đặc biệt giữa trẻ và mẹ.)

Attitude /'ætɪtʊd/ (n) — A settled way of thinking or feeling about someone or something.

Example: Having a positive attitude can make a big difference when facing difficult challenges.

(Đây là một danh từ dùng để chỉ thái độ.)

Avoidance /ə'vɔɪdəns/ (n) — The

action of keeping away from or not doing something.

Example: *Avoidance behavior is common among people suffering from social anxiety.*
(Trong tâm lý là hành vi né tránh những điều gây khó chịu.)

Catharsis /kə'tɑ:rsɪs/ (n) — The process of releasing, and thereby providing relief from, strong or repressed emotions.

Example: *Writing in a journal can be a powerful form of catharsis for many people.*
(Đây là một danh từ dùng để chỉ sự giải tỏa cảm xúc, sự thanh tẩy tâm hồn.)

Clairvoyance /kler'vɔɪəns/ (n) — The supposed faculty of perceiving things or events in the future or beyond normal sensory contact.

Example: *She claimed to have the gift of clairvoyance and could predict future events.*

(Đây là một danh từ dùng để chỉ khả năng thấu thị hoặc ngoại cảm.)

Compulsion /kəm'pʌlʃn/ (n) — An irresistible urge to behave in a certain way.

Example: *He felt a strong compulsion to check that the door was locked every five minutes.*

(Đây là một danh từ dùng để chỉ hành vi cưỡng chế, thôi thúc không cưỡng lại được.)

Conflict /'kɒnflɪkt/ (n) — A serious disagreement or argument.

Example: *Inner conflict between duty and desire can cause a great deal of stress.*

(Trong tâm lý học là sự xung đột nội tâm.)

Conformity /kən'fɔ:rməti/ (n) — Compliance with standards, rules, or laws.

Example: *Social conformity often pressures individuals to act like everyone else.*

(Đây là một danh từ dùng để chỉ sự tuân thủ hoặc tính đồng nhất với đám đông.)

Consensus /kən'sensəs/ (n) — A general agreement.

Example: *The team reached a consensus after a long and difficult discussion.*

(Sự đồng thuận trong nhóm.)

Correlation /,kɒrə'leɪʃn/ (n) — A mutual relationship or connection between two or more things.

Example: *There is a strong correlation between poverty and poor mental health.*

(Đây là một danh từ dùng để chỉ sự tương quan giữa các yếu tố tâm lý.)

Counseling /'kaʊnsəlɪŋ/ (n) — The provision of assistance and guidance in resolving personal or psychological problems.

Example: *Marriage counseling can help couples improve their communication and resolve conflicts.*

(Đây là một danh từ dùng để chỉ hoạt động tư vấn tâm lý.)

Creativity /,kri:ei'tɪvəti/ (n) — The use of the imagination or original ideas, especially in the production of an artistic work.

Example: *Creativity is a highly valued trait in many different fields of work.*

(Đây là một danh từ dùng để chỉ sự sáng tạo.)

Crisis /'kraɪsɪs/ (n) — A time of intense difficulty, trouble, or danger.

Example: *A midlife crisis often involves a period of intense self-reflection and change.*

(Đây là một danh từ dùng để chỉ cuộc khủng hoảng tâm lý.)

Critical /'krɪtɪkl/ (adj) — Expressing adverse or disapproving comments or judgments.

Example: *Being overly critical of yourself can lead to low self-esteem.*

(Đây là một tính từ dùng để chỉ sự chỉ trích hoặc mang tính phê phán.)

Delusion /dɪ'lu:ʒn/ (n) — An idiosyncratic belief or impression that is firmly maintained despite being contradicted by what is generally accepted as reality.

Example: *He suffered from the delusion that he was a famous movie star.*

(Đây là một danh từ dùng để chỉ sự hoang tưởng.)

Dependence /rɪ'laɪəns/ (n) — The state of relying on or being controlled by

someone or something else.

Example: *Emotional dependence on a partner can be unhealthy for both individuals.*

(Sự lệ thuộc tâm lý.)

Depression /diˈpreʃn/ (n) — A mental health disorder characterized by persistently depressed mood or loss of interest in activities.

Example: *Depression is more than just feeling sad; it is a serious medical condition.*

(Đây là một danh từ dùng để chỉ bệnh trầm cảm.)

Desire /diˈzaɪər/ (n/v) — A strong feeling of wanting to have something or wishing for something to happen.

Example: *The desire for social approval can influence many of our daily decisions.*

(Đây là một danh từ/động từ dùng để chỉ khao khát hoặc ham muốn.)

Development /diˈveləpmənt/ (n) — The process of developing or being developed.

Example: *Psychological development continues throughout a person's entire life.*

(Sự phát triển tâm lý.)

Deviation /ˌdiːviˈeɪʃn/ (n) — The action of departing from an established course or accepted standard.

Example: *Any significant deviation from normal behavior should be carefully investigated.*

(Sự lệch lạc về hành vi hoặc tâm lý.)

Disability /ˌdɪsəˈbɪləti/ (n) — A physical or mental condition that limits a person's movements, senses, or activities.

Example: *Learning disabilities like dyslexia can make school very challenging for some children.*

(Đây là một danh từ dùng để chỉ sự khiếm khuyết hoặc khuyết tật.)

Discrimination /dɪˌskrɪmɪˈneɪʃn/ (n) — The unjust or prejudicial treatment of different categories of people or things.

Example: *Racial discrimination can have a devastating impact on a person's mental*

health.

(Đây là một danh từ dùng để chỉ sự phân biệt đối xử.)
